PROFESSIONAL SUMMARY

Java Full Stack Developer Intern at SkylIX Technologies Pvt. Ltd. with hands-on experience building enterprise REST APIs and microservices using Java, Spring Boot, Spring Security, MySQL, Redis, Apache Kafka, and Docker. Skilled across the full development lifecycle - database schema design, backend logic, frontend integration, and containerized deployment. Seeking a full-time Software Development Engineer role to contribute to production systems.

TECHNICAL SKILLS

Languages: Java, C, JavaScript

Backend: Spring Boot, Spring Security, Spring Data JPA, REST API Development, JWT Authentication, Microservices

Database and Messaging: MySQL, Redis, Apache Kafka

Frontend: HTML5, CSS3, JavaScript, React

Tools and Platforms: Docker, Git, GitHub, Postman, IntelliJ IDEA, VS Code

INTERNSHIP EXPERIENCE

Java Full Stack Developer Intern | SkylIX Technologies Pvt. Ltd., Bengaluru | Jan 2026 - July 2026

- Developed REST APIs for core business workflows, including listing management and approval processes, using Java and Spring Boot.
- Implemented JWT-based authentication and role-based authorization (RBAC) using Spring Security across all endpoints.
- Built user profile management modules with complete CRUD operations using Spring Data JPA and MySQL.
- Integrated Redis for caching and Apache Kafka for asynchronous event-driven messaging to improve performance and scalability.
- Containerized services with Docker for local orchestration. Maintained version control and collaboration via GitHub.
- Assisted frontend team during API integration and validated all endpoints using Postman.

Tech Stack: Java, Spring Boot, Spring Security, Spring Data JPA, MySQL, Redis, Apache Kafka, Docker, Postman, GitHub, IntelliJ IDEA

PROJECTS

Smart Plant Management System (IoT) | 2025

- Engineered an Arduino-based IoT greenhouse system tracking temperature, humidity, and soil moisture in real time, triggering automated irrigation that cut water usage by 30-40% and eliminated manual intervention entirely.
- Developed a real-time web dashboard with sensor data visualization and threshold-based alert notifications, enabling remote proactive management and historical trend analysis for predictive maintenance.
- Implemented a sensor-driven control algorithm that adapts irrigation schedules based on live environmental readings, improving crop yield consistency and reducing resource waste.

IdeaVault - Personal Idea Management Platform | 2026

- Built a full-stack idea management web application enabling users to capture, organize, and track personal ideas through a centralized dashboard with real-time statistics (total, daily, weekly, and monthly idea counts).
- Implemented secure JWT-based authentication with role-based access control, along with profile and account settings management including password updates.
- Designed core features including idea creation and editing with tags, priority, and status; a favorites system; advanced search and filtering by status, priority, and date; and a calendar view for visualizing ideas by date.
- Added data export functionality supporting PDF, Excel, and CSV formats, and an activity feed that logs recent actions (create, update, favorite) for user transparency.

Tech Stack: React, JWT Authentication, RBAC, REST APIs, Responsive Dashboard UI

EDUCATION

B.E, Computer Science and Engineering | Sri Sairam College of Engineering, Bengaluru | 2022 - 2026

CGPA: 8.99 / 10.0

CERTIFICATIONS

Infosys Springboard - Principles of Generative AI | Oracle Certified Foundations Associate | IBM - Data Fundamentals

CORE COMPETENCIES

Backend Development, REST API Design, Microservices Architecture, JWT and RBAC Security, Docker and Containerization, Database Design, Problem Solving, Clean Code Practices, Team Collaboration, Version Control (Git), Quick Learner, Effective Communication
